

From Li-Fraumeni to Heritable TP53-related Cancer Syndromes

Prof. Thierry Frebourg
Head Dept. Genetics,
Rouen University Hospital,
France

Time and date:
14 October, 16:00 CEST

Prof. Thierry Frebourg, head of the Department of Genetics of the Rouen University Hospital, France, will focus on Li-Fraumeni and heritable TP53-related cancer syndromes during this 5th ERN GENTURIS webinar.

In this webinar he will discuss which patients should be tested for TP53, how germline TP53 variants should be interpreted and what the medical consequences of germline TP53 variants are.

Also, the type of medical follow-up that should be offered to germline TP53 variant carriers will be discussed.
