

Polygenic Risk Scores for Breast Cancer Risk Stratification

11 December 2025, 13:00–16:00

*Gullstrandsalen, Entrance 85, Uppsala University Hospital
(Hybrid event – Zoom participation available)*

Join us for an afternoon dedicated to the future of polygenic risk scores (PRS) and their implementation in breast cancer prevention and clinical care. The event will feature presentations from international and national experts, followed by a discussion on opportunities and challenges for future implementation in Sweden.

Programme

From Polygenic Risk Scores to Clinical Action: The BRIGHT Project Experience -
Neem Tõnisson, Professor of Clinical Genetics, Estonian Biobank / Institute of Genomics, University of Tartu, Estonia

Precision Prevention and the Future of Cancer Screening
Peeter Padrik, MD, PhD, OÜ Antegenes, Tartu, Estonia

Cost-effectiveness of PRS Screening for Breast Cancer: Results from the BRIGHT Project for Estonia, Sweden, and Portugal
Filipa Sampaio, Associate Professor, Uppsala Health Economics, Uppsala University

“Polygenic Risk Scores for Familial Breast Cancer at the Department of Clinical Genetics”
Daniel Eriksson, MD, PhD, Department of Clinical Genetics, Uppsala University Hospital

Registration: Please register by 4 December 2025 via the following link:
